

## Managing the Oral Health of Patients at Risk of Medication-related Osteonecrosis of the Jaw

In the situation where a patient initially presents with an established history of anti-resorptive or anti-angiogenic drug use, follow the advice for extractions or other procedures that impact on bone in the lower section of the diagram.

For further details of the guidance recommendations and advice on following them, refer to the full guidance, available at [www.sdcep.org.uk](http://www.sdcep.org.uk)
